PROJECTS

HOSTEL MANAGEMENT SYSTEM

- FRONT-END :- PHP AND HTML
- BACK-END :- MySQL.
- DESCRIPTION :-

The Project is the web based software to provide the college students accommodation to the university hostel more efficiently. It will deal with the problems in managing the hostel and its activities in the hostel. Since, the past few years the number of the institution is increasing rapidly. Thereby the number of hostel is also increasing for the accommodation of the students who are coming from far distance to complete their education in the university. Hence the warden has lot of stress on the warden and the administration who are running the hostel. This project will minimize the manual work and the hostel management an easier job for the hostel authorities. It will improve the efficiency of the system and will overcome the drawbacks in the existing system.

LANGUAGE

Proficiency in English, Hindi, Marathi

ACTIVITIES

Volunteer for Community Service Programme (From 19 June 2022 to 28 June 2022) at Athma NGO, Hyderabad. Worked on a project titled "Plant For Me", the first-ever tree planting charity initiative. With the help of their service, we will be able to successfully plant 1,00,000 trees by the end of 2022.

Attended Bootcamps regarding Python and Data Analytics and Dashboard with Excel.

Tutored 20 high school students in English Mathematics and Science with a 100% subsequent pass rate.
